Alberto J. Paracchini, President and Chief Executive Officer of Byline, commented, "Our fourth quarter performance completed another strong year for the Byline franchise. In 2019, we completed another accretive acquisition with the addition of Oak Park River Forest Bankshares, capitalized on disruption in the Chicago marketplace to add significant new banking talent to our organization, and continued to attract new commercial clients to the Bank. As we moved through the year, we also made steady progress on improving our deposit mix and better managing our funding costs. Our improving profitability enabled us to initiate a cash dividend in the fourth quarter and deliver additional value to our shareholders. With the strong foundation we have built and our unique positioning in the Chicago market, we believe we have good opportunities to continue enhancing the value of our franchise in the coming years."

- (1) Loan and lease balances are net of deferred origination fees and costs and initial indirect costs. Non-accrual loans and leases are included in total loan and lease balances.  
(2) Interest income and rates exclude the effects of a tax equivalent adjustment to adjust tax exempt investment income on tax exempt investment securities to a fully taxable basis due to immateriality.  
(3) Represents the average rate earned on interest-earning assets minus the average rate paid on interest-bearing liabilities.  
(4) Represents net interest income (annualized) divided by total average-earning assets.  
(5) Average balances are average daily balances.

Net interest income for the fourth quarter of 2019 was \$53.9 million, a decrease of \$3.9 million, or 6.8%, from \$57.8 million for the third quarter of 2019.

The decrease in net interest income was primarily due to:

- A decrease of \$5.2 million in interest and fees on loans and leases, mainly due to a \$2.3 million decrease in accretion income on acquired loans and lower average yields on loans as a result of decreases in short-term rates in September and October 2019.

Partially offset by:

- A decrease of \$854,000 in interest expense on Federal Home Loan Bank advances, mostly due to a decrease in average advances during the quarter as average lower-cost deposits grew; and
- A decrease of \$293,000 in interest expense on deposits, as a result of lower average time deposit balances and cost attributable to maturities of higher-rate time deposits.

Net interest margin for the fourth quarter of 2019 was 4.32%, a decrease of 30 basis points compared to 4.62% for the third quarter of 2019. Total net accretion income on acquired loans contributed 43 basis points to the net interest margin for the fourth quarter of 2019 compared to 62 basis points for the third quarter of 2019, a decrease of 19 basis points. The net interest margin decrease during the fourth quarter of 2019 was primarily driven by decreased loan and lease yields largely resulting from decreased loan accretion income and decreases in short-term rates.

The average cost of total deposits was 0.88% for the fourth quarter of 2019, a decrease of six basis points compared to the third quarter of 2019, mainly due to a favorable change in deposit mix and a lower average cost of time deposits. Average non-interest-bearing demand deposits, money market accounts, and interest-bearing checking accounts grew by \$65.4 million, \$54.8 million, and \$40.9 million, respectively, while average time deposits decreased by \$38.4 million.

#### Provision for Loan and Lease Losses

The provision for loan and lease losses was \$4.4 million for the fourth quarter of 2019, a decrease of \$1.5 million compared to \$5.9 million for the third quarter of 2019. The fourth quarter included allocations of \$3.2 million for originated loans and leases, \$524,000 for acquired non-impaired loans, and \$694,000 for acquired impaired loans. The provision during the fourth quarter of 2019 for originated loans reflects growth in that portfolio, particularly the unguaranteed portion of government guaranteed loans.

The following table presents the components of non-interest income for the periods indicated:

(dollars in thousands)	Three Months Ended					Year Ended

Non-interest income for the fourth quarter of 2019 was \$14.5 million, a decrease of \$290,000, or 2.0%, compared to \$14.8 million for the third quarter of 2019.

The decrease in total non-interest income was primarily due to:

- An increase of \$935,000 in loan servicing asset revaluation, reflecting an unfavorable change in fair value of the servicing asset as a result of increased prepayments and discount rates; and  
A decrease of \$670,000 in net gains on sales of loans, mainly due to a decrease in average premium on sales of government guaranteed loans.

Partially offset by:

- An increase of \$704,000 in other non-interest income, mostly due to a favorable swap valuation adjustment and increased swap activity; and  
An increase in the change in fair value of equity securities, net, of \$396,000 due to an increase in the fair value of those securities.

During the fourth quarter of 2019, the Company sold \$101.5 million of U.S. government guaranteed loans compared to \$93.3 million during the third quarter of 2019. The increase in sales is principally due to the timing of loans closed becoming fully funded.

The following table presents the components of non-interest expense for the periods indicated:

Non-interest expense for the fourth quarter of 2019 was \$43.7 million, a decrease of \$1.8 million, or 3.9%, from \$45.4 million for the third quarter of 2019.

The decrease in total non-interest expense was primarily due to:

- A decrease of \$1.7 million in legal, audit and other professional fees, as the prior quarter reflected \$1.5 million of non-recurring professional services costs;
- A decrease of \$1.4 million in data processing expense, mostly due to expenses associated with our Oak Park River Forest core system conversion during the prior quarter; and
- A decrease of \$309,000 in salaries and employee benefits, as the prior quarter included acquisition related salary and employee benefit costs.

Partially offset by:

- An increase of \$699,000 in loan and lease related expenses due to higher loan expenses on government guaranteed loans;
- An increase of \$561,000 in occupancy expense, net, largely due to a favorable accrual adjustment to property tax expense in the prior quarter as well as an increase in rental expense related to office expansion; and
- An increase of \$271,000 in advertising and promotions expense due to additional media advertisement during the quarter.

The Company's efficiency ratio was 60.93% for the fourth quarter of 2019, compared with 59.81% for the third quarter of 2019. Excluding merger-related expenses, core system conversion expenses, and impairment charges on assets held for sale, the Company's adjusted efficiency ratio<sup>1</sup> was 60.51% for the fourth quarter of 2019, compared with 58.17% for the third quarter of 2019.

(1) Represents a non-GAAP financial measure. See "Reconciliation of non-GAAP Financial Measures" for a reconciliation of our non-GAAP measures to the most directly comparable GAAP financial measure.

The Company recorded income tax expense of \$4.5 million during the fourth quarter of 2019, an effective tax rate of 22.1%, compared to \$5.9 million during the third quarter of 2019, an effective tax rate of 27.9%. The decrease in the effective tax rate was due to tax benefits recorded as a result of the recognition of tax assets associated with other real estate owned.

#### STATEMENTS OF FINANCIAL CONDITION

Total assets were \$5.5 billion at December 31, 2019, an increase of \$83.5 million compared to \$5.4 billion at September 30, 2019, and an increase of \$579.2 million compared to \$4.9 billion at December 31, 2018.

The current quarter increase was primarily due to:

- An increase in securities of \$154.7 million, reflecting purchases of mortgage-backed securities during the quarter;
- An increase in loans held for sale of \$4.6 million, largely due to the timing of loan originations during the quarter; and
- An increase in other real estate owned of \$3.4 million due to the volume of transfers in exceeding sales.

Partially offset by:

- A decrease in loans and leases of \$45.4 million, mostly due to a decrease of \$112.9 million in our acquired loan portfolio, partially offset by an increase of \$67.5 million in our originated loan portfolio; and  
A decrease in cash and cash equivalents of \$28.1 million due to the redeployment of cash into earning assets.

The following table shows our allocation of the originated, acquired impaired, and acquired non-impaired loans and leases at the dates indicated:

Variances in non-performing assets:

- Other real estate owned was \$9.9 million at December 31, 2019, an increase of \$3.4 million from \$6.5 million at September 30, 2019 due to higher volume of transfers from loans exceeding sales.

U.S. government guaranteed balances of non-performing loans were consistent at \$4.2 million at December 31, 2019 and September 30, 2019.

The following table presents the balance and activity within the allowance for loan and lease losses for the periods indicated:

(dollars in thousands)	Three Months Ended						Year Ended

The allowance for loan and lease losses as a percentage of total loans and leases held for investment increased to 0.84% at December 31, 2019, compared to 0.82% at September 30, 2019 and 0.72% at December 31, 2018.

In June 2016, the Financial Accounting Standards Board ("FASB") issued new authoritative guidance on the recognition of credit losses which replaces the incurred loss impairment methodology in current authoritative guidance with a methodology that reflects expected credit losses. In November 2019, the FASB delayed the effective date of the new authoritative guidance for entities, like the Company, that are not classified as Public Business Entities. Assuming the Company remains an emerging growth company, the new authoritative guidance is effective for fiscal years beginning after December 15, 2022. The Company is in process of implementation and determining the impact that this new authoritative guidance will have on the Company's consolidated financial statements.

#### Net Charge-Offs

Net charge-offs during the fourth quarter of 2019 were \$4.0 million, or 0.42% of average loans and leases, on an annualized basis, a decrease of \$1.4 million compared to \$5.5 million, or 0.56% of average loans and leases, during the third quarter of 2019, and an increase from \$2.1 million, or 0.24%, for the comparable quarter one year ago.

The net charge-offs during the quarter were primarily attributed to the unguaranteed portion of U.S. government guaranteed loans. Net charge-offs for the fourth quarter of 2019 included \$3.6 million in the unguaranteed portion of U.S. government guaranteed loans, while net charge-offs for the third quarter of 2019 included \$4.8 million and fourth quarter of 2018 included \$1.8 million in the unguaranteed portion of U.S. government guaranteed loans.

The following table presents the composition of deposits at the dates indicated:

Total deposits were \$4.1 billion at December 31, 2019, an increase of \$67.3 million compared to September 30, 2019, an increase of 1.6%. Non-interest-bearing deposits rose to 30.9% of total deposits at December 31, 2019 from 29.9% at September 30, 2019.

The increase in the current quarter was primarily due to:

- An increase in money market demand deposits of \$136.2 million, from \$745.2 million at September 30, 2019 to \$881.4 million at December 31, 2019, largely driven by growth in business account balances; and
- An increase in non-interest-bearing demand deposits of \$58.2 million, from \$1.2 billion at September 30, 2019 to \$1.3 billion at December 31, 2019, also driven by increases in business account balances.

Partially offset by:

- A decrease in time deposits of \$97.3 million, from \$1.3 billion at September 30, 2019 to \$1.2 billion at December 31, 2019, principally driven by decreases in brokered certificates; and
- A decrease in interest-bearing checking deposits of \$33.9 million, from \$372.0 million at September 30, 2019 to \$338.2 million at December 31, 2019, mainly driven by NOW business account balances.

Total borrowings and other liabilities were \$624.1 million at December 31, 2019, an increase of \$2.0 million from \$622.1 million at September 30, 2019, mainly due to an increase in securities sold under agreements to repurchase partially offset by a decrease in FHLB advances.

#### Stockholders' Equity

Total stockholders' equity was \$750.1 million at December 31, 2019, an increase of \$14.2 million from \$735.9 million at September 30, 2019. The increase was due to net income generated during the quarter less dividends declared. On December 12, 2019, the Company announced that its Board of Directors declared the first cash dividend on its common stock of \$0.03 per share for the fourth quarter of 2019.

Stockholders' equity increased \$99.4 million from \$650.7 million at December 31, 2018. The increase was mainly due to net income generated during the year and the stock consideration issued in connection with the acquisition.

On November 1, 2019, the Company announced that its Board of Directors approved a stock repurchase program authorizing the purchase of up to an aggregate of 1,250,000 shares of the Company's outstanding common stock. The program will be in effect until December 31, 2020, unless terminated earlier. The Company has not made any stock repurchases under this program.
